I've gone through your plan of operations and our checklist for items required for the NOI, and here is the missing information:

1. The NOI needs to state who the surface and mineral owners are and give their address. (We both know it's the BLM Price Field Office, but the NOI needs to have this and their address.)
2. Have the surface and mineral owners been notified in writing?
3. Do you have a proposed starting date? How long do you anticipate the project will continue?
4. Please include the BLM project number and/or the claim numbers (prefer the project number).
5. Include a list of company officers, president, secretary, treasurer, etc., and their addresses.
6. Please state the type of material to be mined (the plan just says "stone").
7. State the length of the new road.
8. Show how much material will be removed—product, overburden, and topsoil.
9. You need to include a statement signed by an officer of the company that you will conduct reclamation as required by the R647 rules.
10. It's useful if you can include your fax number and an e mail address for a contact person. We have these, but they should be included in the NOI.

I have not checked your legal description. The one in the deficiency letter appears to have been wrong.

We also need the map as we discussed.
